Re: Precautionary Boil Water Advisory

Little Black Bear

Star Blanket

As per information provided to us, due to water plant production issues and having to shut down the water treatment for extended periods of time which can cause a loss in pressure.

We are recommending a Precautionary Boil Water (PBWA) until such time as the water treatment plant can run without interruptions and:

1. A free chlorine level of at least 0.2 milligrams/Litre (mg/L).
2. Two negative bacterial samples.

Precautionary Boil Water Advisory

February 10, 2025

This notice is to advise you that due to water plant production issues and having to shut down the water treatment for extended periods of time which can cause a loss in pressure.

We are recommending a, Precautionary Boil Water (PBWA) until such time as the water treatment plant is able to run without interruptions and:

1. A free chlorine level of at least 0.2 milligrams/Litre (mg/L).
2. Two negative bacterial samples.

You are advised to boil water that is to be used for **drinking, cooking or brushing your teeth**, for 3 minutes before it is used.

You will be notified, once testing is completed to ensure that the water is safe to drink.

If you have any questions or concerns, please contact your Water Treatment Plant Operator or Vaughn Williams at 306-331-7930.

Vaughn Williams, BAsC., CPHI(C)
Environmental Public Health Officer
